Home: House 147 Gulberg A, 38000 Faisalabad (Pakistan)

ABOUT ME

I am an AI Engineer and early-career researcher with a strong academic foundation in **Machine Learning, Natural Language Processing, and Generative AI**. My interests lie at the intersection of **applied machine learning systems and research-driven experimentation**, particularly in large language models, intelligent decision-making systems, and data-centric AI.

I have hands-on experience working in both **industrial and research-oriented environments**, contributing to model development, experimentation, evaluation, and deployment. I am motivated to pursue advanced academic training (Master's/PhD) to deepen my research capabilities and contribute to impactful, ethically grounded AI systems.

WORK EXPERIENCE

Cybergen – Faisalabad, Pakistan

AI Engineer & Research Contributor

[01/10/2025 – Current]

- Contribute to **research-driven AI and machine learning projects**, supporting experimentation, model evaluation, and iterative improvement.
- Assist in **data preparation, feature engineering, and validation pipelines** for research and applied AI systems.
- Support senior researchers in **problem formulation, methodology design, and experimental analysis**.
- Participate in **technical documentation, reporting, and manuscript preparation** for research outputs.
- Engage in mentoring, workshops, and knowledge-sharing activities focused on AI fundamentals and applied ML research.

Technupur – Faisalabad, Pakistan

AI Engineer

[01/2024 – 30/09/2025]

Started as a Power Platforms Developer, swiftly transitioning into the AI field, fueled by a longstanding passion. I've led projects in OCR, LLMs GenAI, and advanced NLP.

- Designed and deployed **advanced RAG chatbots** in **Azure AI Studio** with **vector databases** and **automated retraining workflows**.
- Led development of **LLM-based enterprise solutions**, fine-tuning models using **LoRA and QLoRA** for optimized performance.
- Built **Pythonic ETL pipelines** in AWS, transforming **trip data** to compute **CO2 emissions**, integrating results with AWS Lambda.
- Created **business intelligence (BI) dashboards**, collaborating with **data engineering teams** to optimize data loads.
- Spearheaded AI-driven **computer vision projects**, applying **object detection and image classification** for real-world applications.
- Conducted **client discussions** to design and implement **custom NLP solutions**, revolutionizing product offerings

Technupur – Faisalabad

SPO Developer

[03/07/2023 – 12/2023]

Intern turned full-time Power Platforms Developer, led projects and mentored interns. Designed and developed various client and internal projects, such as intranet systems and automated workflows: Projects:

- Led development of intranet system using Power Apps and Power Automate & Sharepoint.
- Built OCR systems and automated workflows with AI Builder, Power Apps, Power Automate, and Power BI.
- Implemented SharePoint solutions with custom SPFx components using React for clients and internal use.

 **The Sparks Foundation** – Remote, Singapore

Data analyst

As a Data Analyst intern, I ensure data accuracy through cleaning and visualization using Python, while also participating in Kaggle competitions to refine problem-solving and model-building skills.

- Performing data cleaning, pre-processing, validation, and Python-based data visualization.
- Exploring and analyzing Kaggle datasets and participating in Kaggle competitions for skill development.

EDUCATION AND TRAINING

Bachelors of Computer Science

The University of Faisalabad [21/10/2019 – 28/06/2023]

City: Faisalabad | Country: Pakistan | Website: <https://tuf.edu.pk/> | Final grade: 3.5 GPA | Thesis: Agfow

Diploma of Artificial Intelligence & Computing

Presential Initiative for Artificial Intelligence & Computing [2020 – 2022]

City: Faisalabad | Country: Pakistan | Website: <https://www.piaic.org/>

LANGUAGE SKILLS

Mother tongue(s): Urdu | Panjabi; Punjabi

Other language(s):

English

LISTENING B2 **READING** C2 **WRITING** C1

SPOKEN PRODUCTION B2 **SPOKEN INTERACTION** B2

SKILLS

Python / SQL / Github / Tensorflow / Scikit Learn / Machine Learning / Pandas / Keras / Deep Learning / Power BI / NLP / LLM / Oracle / Vector Database

HONOURS AND AWARDS

Grand prize winner in China-Asean International IoT Competition 2023.

Selected for the Prime Minister's Innovation Program, ranked among the top 250 out of 12,000 projects by NUST

Scholarship Award Received a 60% scholarship for the duration of my Bachelor's degree in recognition of outstanding academic performance.

[2023] Microsoft

Awarded Beta Microsoft Learn Student Ambassador for creating learning opportunities among students.

Certificate of Distinction - The University of Faisalabad

PROJECTS

AGFOW, Plant Disease Detector Developed a full-stack system combining Django, Flutter, and Flask for user authentication, data processing, and machine learning predictions, ensuring a seamless and secure user experience

Med RAG Chatbot Developed an RAG chatbot in Azure AI Studio for the medical industry, enabling users to upload reports for comparison against existing data while providing detailed responses to specific medical queries.

AI-Powered Resume Screening System Created an **AI-based Applicant Tracking System (ATS)** using **Streamlit** and **Google Generative AI**, evaluating **resumes against job descriptions** with **AI-driven insights and suggestions**.
